webcasting

From stage to screen

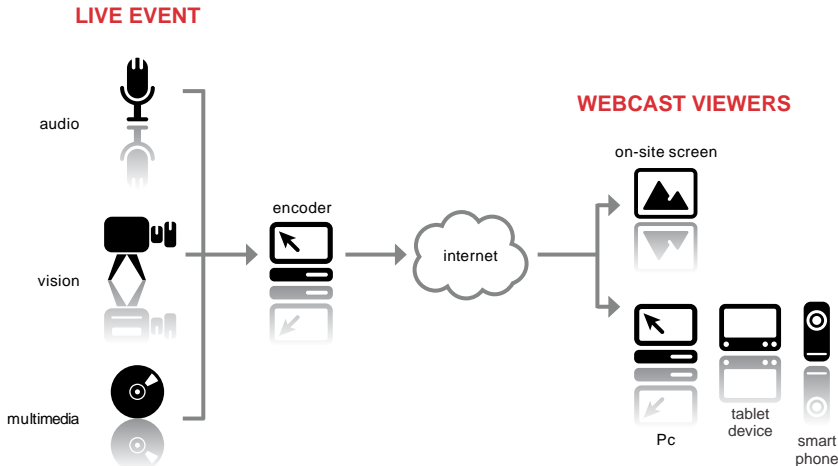

Deliver your message from the venue.

to anyone... at anytime... to anywhere in the world.

How it works?

Event communication is at the crossroads of change with hybrid events. Technology is driving new levels of audience interaction removing time and geographic constraints. All by simply harnessing the power of the internet.

For an engaging and powerful communication webcasting is a powerful tool as it allows streaming video and audio content. Webcasting allows you to upload video and audio content directly to the worldwide web connecting you directly to a new, virtual audience. Taking you from stage to screen.

Add Impact, Interactivity and Interest.

Webcasting For All Events & Devices

AGMs & Investor Relations

- Live webcast out to share holders who cannot attend the venue.
- Record the AGM and corporate announcements for compliance.

Conferences & Exhibitions

- Video vox pops and testimonial interviews from event attendees.
- E-blasts promoting daily video highlights to registered non attendees.
- Post event marketing building momentum for next year.

Domestic Event

- Live webcast of wedding, birthday party etc.
- Feel the live touch for your closest relatives.

Product Launches

- Live webcast for simultaneous release of embargoed information.
- Website information resource with product demonstrations, tutorials and customer support.
- On-demand video content for viral campaigns.

Internal Communications

- Live webcast of major company announcements.
- Online sales training videos.
- Dedicated video portals categorising and managing internal digital content.

Gala Dinner & Award Nights

- Live webcast major events for increased exposure and a higher profile.
- On-demand webcasts for post event marketing.
- Employ the video content in online advertising, PR and promotional campaigns.

Educational Program

- Live webcast of important classes for increased exposure.
- On-demand webcasts for a particular class.
- Valuable speech for centralized class room.

Integrated Event Services

Digital Image Solution (A Unit of Virtual Solution) is a leading webcasting & video conferencing company with a great degree of expertise in managing online events to promote your messages products & services across the globe.. Webcasting is the live broadcasting of video and audio via the Internet or Intranet.

Webcasting is an exciting way to share your event with people who can't be there in person. Anyone with an internet connection can see everything that goes on at your event, whether they are across town, across the country, or on the other side of the world. The best part is they don't even have to wait for the event to be over and recorded. They can watch it live as it happens.

A webcast is a media file distributed over the Internet using streaming media technology. A webcast may either be distributed live or on demand. Simply put webcasting is nothing but "broadcasting" over the Internet.
